SHIKHAR SCHOOL
Laugh Learn Live

has been established with lots of love and affection. We are a school run by a team whose members have devoted their lives to education. It has been established with an intention to change the way children learn. We believe that education should be a fun and engaging experience. It should spread as much giggles and joy as it spreads knowledge. Our curriculum thus focuses on creating an interactive environment where our pupils look forward to learning every day.

Shikhar School strongly believes that the outcome of learning is sustainable only when pupils understand a concept right from its base. We have put our effort toward strengthening their foundation. It is not rote-learning that will make them capable of living a meaningful life. They are better prepared for the future when they can look beyond what is offered to them at the surface. They will be happier when they can see things for what they are. This can happen when we nourish their curiosity and encourage them to dive into the depth of their learning.

Spread across 30,000 Sq. Ft. campus our school truely believes in bringing our students close to nature with fresh air from the trees planted around the school campus and bringing in a lot of positive energy from the nature itself marks the essence of our campus.

## Our Core Values:

# Laugh.
# Learn.
# Live.

We stick by our values of imparting love and laughter to our students, which eventually helps them learn better in an environment that is stress free and conducive for learning. Our core values also includes imparting education in a nature friendly zone where we are surrounded by greenery and love for our nature, protecting them and nurturing them which eventually helps us learn values of care and empathy. We believe that nature is the greatest teacher who helps us teach the values of being strong in difficult times.

## About the curriculum:

Our curriculum focuses on four prime areas. They are: Social emotional development, Language and literacy development, mathematics and reasoning development, and creative development.

**Social emotional development:**
The component is about identifying feelings, building and maintaining relationships, self-regulating emotions, and developing soft skills.
Many researches suggest that emotional progress and cognitive growth are directly related. Children who have healthy social and emotional development perform better in their academics. Integrating the component in every lesson is an integral part of what we do at Shikhar School.

**Language and literacy development:**
The skill refers to a child's ability to communicate and connect with others through the use of language. It can be done by listening, reading, writing, and speaking. Our curriculum has been prepared in a way that it hits all the four components. Developed language skill allows children to put their thoughts into words. It helps them build and nurture healthy relationships. It also expands their realm of learning.

**Mathematics and reasoning development:**
The skill includes a child's ability to count, compare, make sense of numbers, learn measurement, and see patterns.
Children's early mathematical experiences play a significant role in the development of their understanding of mathematics, and serve as a foundation for their cognitive development.Early experience in mathematics and its strong foundation ensure permanent positive outcomes. Shikhar School with its strategically designed lesson plans aims to make students comfortable with the subject early on.

**Creative development:**
The development points toward expressing inner thoughts and imagination using a form of art such as music, dramatic play, painting, and dancing.
Children who score higher on tests of imagination and creativity develop stronger problem-solving strategies. Our curriculum is art-infused so that students learn to transform their vivid imagination into stark reality that others can observe. It provides a platform for them to nurture their creativity and express themselves with their chosen art in ways only they can.

## Learning at the core of everything:

In order to meet the curriculum challenge which focuses on actionability and practical approaches we have focused on some core teaching pedagogy which helps students in gaining knowledge with minimum exertion and stress. Our teaching efforts are assisted by outdoor STEAM lab, SMART class, Parents room, English Lab which is one of a kind followed by fine and performing arts and Nature and world awareness.

The faculty, teaching pedagogy and facilities are truly of world-class standards, kindling a love for learning, a respect for cultural diversity and a strong sense of social responsibility among the students. Based on a progressive and inclusive curriculum, our teaching approach is innovative and challenging in both content and delivery. Students achieve most when they enjoy their learning. In essence, we encourage active student participation in the classroom and parents' involvement at home. Proactive setting of targets and monitoring of achievement ensure that all students make the best possible progress, and we encourage them to take increasing responsibility for their own improvement. Students are given opportunities to develop their own talents as well as to be aware of national and global issues, while contributing to the healthy development of the needs of their own school, home and community.

# About the School:

Positive values and relationships Committed to maintaining a safe and positive environment that is conducive to learning, we foster an ethos that values respect, tolerance and co-operation. The school is characterised by a calm atmosphere and excellent relationship between the students and the staff. School bullying is completely discouraged and regular events are held to make students aware of the same.

**Well-ventilated classrooms:** Our grade as well as subject classrooms are large, clean and airy, providing the right kind of atmosphere for children to concentrate while enjoying the learning process to the fullest.

**Food and water:**
Our students love the food at school. We provide freshly cooked, nutritious food for breakfast, lunch and snacks. Water is filtered through the reverse osmosis system and special meals are served on special occasions.

**Restrooms:**
Our restrooms are child friendly and easily accessible from all areas of the school. All restrooms are kept clean at all times.

**Playing areas:**
The school has well designed playing areas for the children to enjoy and learn in a safe environment.
